13 □ Other:						

Continuation of 11. does NOT place the application in condition for allowance because: With regards to Applicant's arguments as presented in page 22, the Applicant's have stated that the supposed motivation to combine is too vague and legally insufficient. The Examiner cited the motivation to combine as "in order to keep the fragmentation of the database and other files residing on the hard drive to a minimum and prevent search performance from suffering" The Examiner contends that such a motivation is not too vague or legally insufficient but rather exactly the purpose of applying a defragmentation function that the Examiner has characterized as a redistribution effort. As the Examiner has cited in the action, the defragmentation process may be characterized as a redistribution effort. Defragmentation involves the movement of files that are fragmented on the harddrive into locations lumped closer together. The purpose of this is to expedite the search function. Defragmentation is a well known process that is used for precisely the particular reason the Examiner has cited as his motivation. The Examiner has found the Applicant's arguments unpersuasive and the rejections are maintained..
